### WHY CHOOSE AQUAPHOR MORION DWM-101S?

It covers all issues of household water purification and completely replaces premium bottled water.

This innovative water filter does not require electricity and operates on water tap pressure.

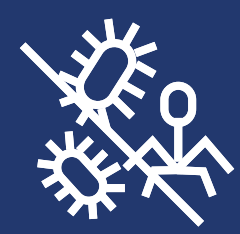

This filter can reduce common water tap contaminants such as, chlorine, organic compounds, bacteria and viruses and optimise the concentration of Magnesium and Calcium in the water for added health benefits.

### How often should filter membrane/ cartridges be replaced?

Based on an average consumption, the recommended period to replace the filter cartridges is 6 months and the filter membrane should be replaced within 1 year.

Optimizes Ca and Mg Concentration

99.9% Protection against viruses and bacteria

Zero plastic waste

No Electricity needed

## AQUAPHOR RO PRO 100 DISPENSER

HIGH PERFORMANCE PURIFICATION SYSTEM WITH HOT AND COLD WATER TANKS

The AQUAPHOR RO PRO 100 DISPENSER is a water purifier which treats tap water into hot and cold high quality drinking water.

The system completely replaces premium bottled water as it filters out contaminants, including toxic substances, heavy metals, pharmaceutical residues, bacteria and viruses. Hardness salts are completely removed from the water, making hot drinks taste better and extending the life of your coffee machine or kettle. Filtered water enriched with Calcium

Optimizes Ca and Mg Concentration

99.9% Protection against viruses and bacteria

Zero plastic waste

Improves the taste of food and drinks

## AQUAPHOR MORION RO-206S-C

INTELLECTUAL HIGH VOLUME RO SYSTEM WITH TWO MEMBRANES

This RO-206s reverse osmosis system for commercial application features patented retentate recirculation system and unique automatic membrane scrubbing system.

### Advantages of RO-206S-C:

- Recovery up to 80%
- 300 GPD filtration rate
- Highly efficient, built-in electric pump
- LCD control panel
- Built-in 5 L (1.01 gal) water-on-water storage tank
- Optional connection to external tank
- Minimal operating pressure of 0.8 bar
- Reverse osmosis membrane post-filtration
- Size: 371x190x420 mm (15"x7"x16")

Optimizes Ca and Mg Concentration

99.9% Protection against viruses and bacteria

Zero plastic waste

Improves the taste of food and drinks
